BREAKING NEWS

Khush ingredients de Nederland are now Kosher Certified!

CLP Update

The European Parliament and the Council of the EU have reached a provisional agreement on the revision of the CLP (Classification, Labelling, and Packaging) Regulation for Chemical Substances and Mixtures.

A key highlight is the proposed derogation for natural essential oils from the mixture rule. This means that when essential oils are to be classified, they will be considered as a whole, rather than classifying each specific component. This streamlines the classification process, sparing businesses unnecessary research and safeguarding rural economies.

This is a positive step for the industry, recognising the unique nature of natural essential oils and promoting a more efficient regulatory environment.
